Ms. Lennox: I am forwarding the foregoing thread of emails to you, and others, at Mr. Plsek's request. I believe they are self-explanatory and should give you some idea of the situation I, as a landowner, find myself in. If you have any questions please respond to this email and I will be glad to supply you with any information I have. Long story short is that the work done at our site, though extensive, leaves us with a property that cannot be cultivated or used for grazing. We need someone to look into this. Thank you. (b) (6)

Mr. (b) (6),

I hope you are doing well. Unfortunately, I do not have an update at this time. Please refer to Ursula Lennox, Remedial Project Manager U.S. EPA (6SF-RL) phone (214) 665-6743 Lennox.Ursula@epa.gov for future inquiries. Mrs. Lennox may have more information for you at this time.

Thanks,

Rob

Mr. Plsek: I'm requesting an update on our concerns. Last contact from you indicated your management was to submit information to EPA about said concerns. Anxiously awaiting word from you. The spring months about upon us and any further work out there will need to be done soon. (b) (6)

Mr. (b) (6) ,

First of all Happy New Year and hope you have a great year!

As for the status of your property concerns, the EPA has requested some information from my management . My management is collecting and organizing this information then will be submitting to the EPA.

Thanks

Rob

Mr. (b) (6) ,

Thank you for speaking with me earlier on the phone. As I stated, I will forward this information to my management and the EPA and that we would get back with in regards to your concerns.

Have a pleasant evening.

Subject: restoration work on (b) (6) property

Robert Plsek, Construction Superintendent, CH2MHill Constructors, Inc., 12377 Merit Dr., Ste. 1000, Dallas, TX 75251; Robert: I am writing about the restoration work done by your company for the EPA on our property in Ottawa County, Oklahoma, which is about 3 miles east of Picher, OK., and sometimes described as the (b) (6) Mine. On completion of the work my brothers and I complained that there were too many large rocks scattered about the acreage which would make mowing and/or baling impossible. Nothing was ever done about this. It was seeded for grass but nothing has ever come up and it is now just a sea of ragweed. I talked to a local farmer, (b) (6), about cultivating it for row crops but after looking at it he didn't believe it was farmable and declined the offer. He's a reliable and successful farmer in this area and has hundreds of acres under cultivation and so his opinion is credible. Before the work was done we could at least graze cattle on part of it and there were several meadows of blue stem prairie hay that could be baled. Now we don't even have that. We would like to discuss this problem with you and pursue possible avenues that might help rectify this predicament. Please respond when you can. I am also sending a copy of this email to (b) (7)(C) who is with the (b) (7)(C) as well to my brother and co-owner of the property, (b) (6). Thank you. (b) (6).
